Design no. 20 C.

FISH APPLIQUÉS

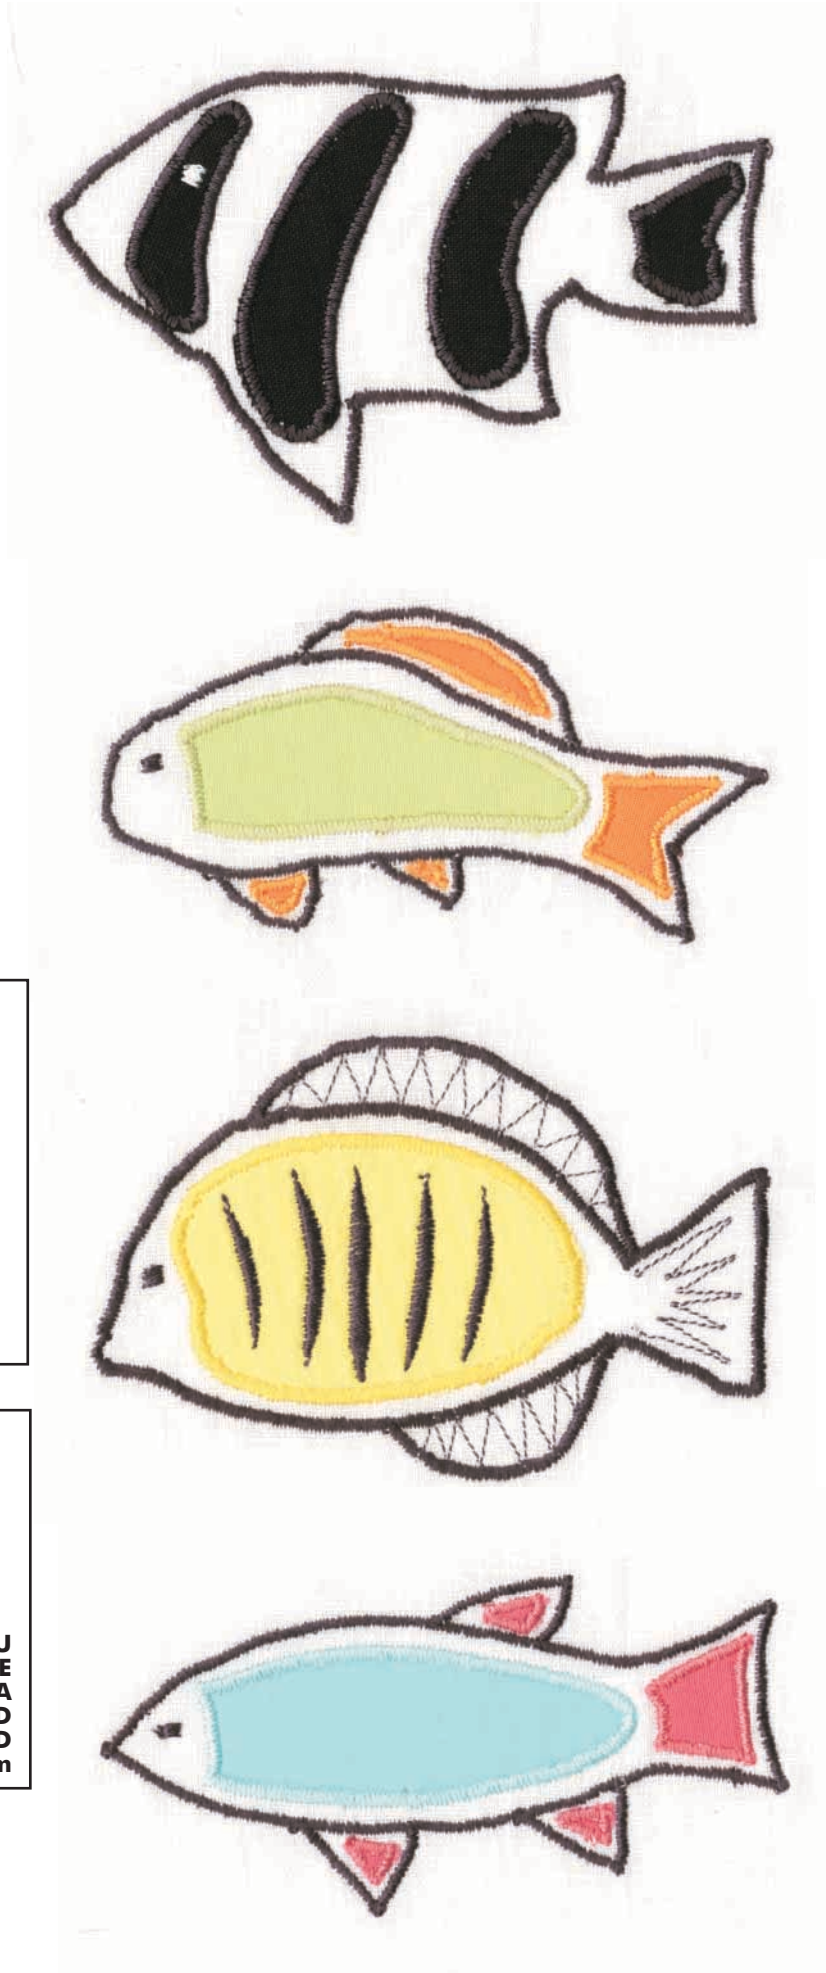

Trace outlines of fish motifs on pieces of water-soluble embroidery stabilizer. After determining placement of fish motifs on front skirt panel, pin pieces of embroidery stabilizer to right side of skirt panel. Pin pieces of tear-away backing to wrong side of skirt panel under fish motifs. Embroider outlines of fish with narrow, short zigzag using black thread. Remove embroidery stabilizer by gently tearing it off first. Wash remaining embroidery stabilizer off by dabbing embroidered area with piece of light-colored cloth moistened with water.

Trace colored parts of fish as mirror image on paper backing of double-sided fusible web. Fuse parts to pieces of fabric in appropriate colors. Cut shapes out along their outlines, remove paper backing and fuse shapes to embroidered fish motifs. Stitch edges of appliqué shapes with narrow, short zigzag.

Embroider stripes on yellow fish with zigzag stitch in various widths and fins with straight stitch. Embroider eyes on each fish. Remove pieces of tear-away backing and secure thread ends carefully to wrong side.
